

Community Healthcare System General Endowment

Community Healthcare System is the leading medical provider in Northwest Indiana, operating three non-profit hospitals, several outpatient clinics and physician offices. Together, the three hospitals operate one of the largest cardiovascular and cancer treatment programs in Northwest Indiana. They are joined by a strong vision of caring demonstrated by their efforts to help those in need and through initiatives to build healthier communities to improve the quality of life. Gifts to Community Healthcare System will support all three hospitals and the services they provide.

Community Hospital Medical Technology Endowment

Community Hospital is faced with the continual challenge of meeting medical technology advances. While there appears to be no limit to what technology can accomplish, there are limits to the financial resources of the hospital. It is essential that we acquire new technologies to provide the best medical care to allow the physicians and medical professionals of Community Hospital to meet the needs of our patients.

St. Mary Medical Center Surgery Endowment

Medicine has made amazing advances in surgery that require smaller incisions and less time in the operating room. It also offers quicker and safer recovery times for patients. Yet, with the endless possibilities for treating our community with specialized and even routine surgeries, comes the escalating cost of space and maintaining equipment. To ensure that the hospital will be able to support the continuing advances in surgical equipment, renovate space to accommodate demand, and offer the best technology to attract the best physicians for our patients, the surgery endowment is being created.

St. Catherine Hospital Technology, Screening and Education Endowment

Today's advances in imaging technology are helping to save lives and improve the quality of healthcare. Early detection will improve survival rates, identify conditions and help prevent potentially debilitating complications. Early identification and intervention can result in less medical care and help lower healthcare costs. This hospital endowment will help acquire the latest diagnostic imaging technology as well as expand community-based education and screening programs for at-risk groups.

Community Cancer Research Foundation Endowment

Cancer is a devastating diagnosis for greater than one million individuals and their families that are forced to face this disease each year. The endowment is to help underwrite continued research and support the Cancer Resource Centre. To continue to help improve the quality of care, research and patient/family support is necessary. Gifts to this endowment will generate hope and support for those struggling with a diagnosis of cancer.

The Community Foundation Board of Directors will have final approval of all spending from endowment funds.
